Application of Communication Theories

Thr, July 9 (Week 3.5)
Text Messengers

Almost the simplest form of communication:

One person sending words to another person.

Fig. 2.1.1 The Lasswell Formula with corresponding elements of the communication process (Lasswell 1948).
Text Messengers

Maybe not...

And what about us?

Happy turkey day hope it was spent with loved ones and friends

Zaira
Happy Thanksgiving!

Jorge outdid himself on the Thanksgiving meal. Absolutely delicious!
Face-to-face Communication as the Gold Standard

We are built to like talking to each other.
Mirror Neuron

(A) Monkey at rest

(B) Grasping execution

(C) Observation of grasping movements

A mirror neuron is in a resting state

A mirror neuron fires

A mirror neuron fires

(No electrical signals)
Synchrony

Emotional, behavioral, and etc.

Chameleon Effect (Chartrand & Bargh, 1999)

: People behaviorally mirror each other by simply seeing each other. Also, they like people mimicked them.
Verbal and Nonverbal Communication

Verbal communication: what you speak

Nonverbal communication: what other things you do

Text Messengers:

   verbal communication in an unnatural form (compared to phone calls)
Media Richness Theory (Daft & Lengel, 1986)
The Case of Messengers

Is having more information channels the better?

A text messengers that immediately sends every letter typed.

vs.

A text messenger that sends messages only after the send button.
Grice’s Maxims (1975)

The maxim of quantity

: where one tries to be as informative as one possibly can, and gives as much information as is needed, and no more.

The maxim of quality

: where one tries to be truthful, and does not give information that is false or that is not supported by evidence.

The maxim of relation

: where one tries to be relevant, and says things that are pertinent to the discussion.

The maxim of manner

: when one tries to be as clear, as brief, and as orderly as one can in what one says, and where one avoids obscurity and ambiguity.
Hyperpersonal Communication (Walther, 1996)

Are more communication channel always better?

Maybe people, over time, learn how to deal with the restriction.
Text Messages vs. Video Conferencing

When do people use text messages, even when they are sure the other person is in front of their phone?

Media Richness Theory vs. Hypercommunication Theory
The Case of Video Conferencing

Would face-to-face become the golden standard this time?
Video Conferencing Issues

Verbal vs. nonverbal: how much is the video stream important?

Degree of details: which do we want to see? Every pixel of each other’s face?

Backgrounds: do people need to see others’ backgrounds?

Trade-off Related to Network bandwidth:

A Deeper Look at Video Conferencing

Worker in field wears head-mounted camera, microphone, and speaker

Expert in office sees what worker sees, hears worker
A Deeper Look at Video Conferencing

• **Object-focused discussion**
  • Verbal/vocal is grounded against/augments visual content

• **Person-focused discussion**
  • verbal cues and nonverbal cues redundant

• **Mixed Discussions**
  • verbal and nonverbal/visual provide complementary content/affect cues
A Deeper Look at Video Conferencing

“Is this the brake cable? Uh huh. Okay, is that in place?”

OBJECT FOCUSED

“I think we ought to emphasize the quality of the bikes we sell, even if it means a lower overall volume.”

PERSON FOCUSED

“I’ve never really seen a brake cable like this. I’m not sure I know how it goes into place. Do you think it’s okay if I work on something else?”

MIXED FOCUS
The Case of AR Telepresence
